TECHNICAL SKILLS

Programming Languages

- JavaScript • TypeScript
- PHP • Python(Basic)

Frontend

- Vue JS • HTML5 • CSS3
- Bootstrap • TailwindCSS

Backend

- Laravel • OOP • Node.js
- RESTful API

Database

- MySQL • Firebase • MongoDB

Tools

- Figma
- GIT/GITHUB
- AWS / Vercel / Netlify

SOFT SKILLS

- Adaptability
- Responsibility
- Collaboration
- Communication
- Time Management
- Task Management
- Research, Teamwork

Languages

- Khmer
- English

VICHET SAT

PERSONAL SUMMARY

Passionate Full Stack Developer skilled in building scalable web applications with Vue.js, Laravel, Node.js, TypeScript, and modern databases. Experienced in developing APIs, responsive interfaces, and AI-powered solutions with a strong problem-solving mindset.

WORK EXPERIENCES

PNC Education System

Full-Stack Developer | July 2026

- Built a Laravel 12 (PHP 8.2), Vue js + MySQL REST API for PNC Education System an internal student lifecycle platform managing enrollment, profiles, ID cards, and evaluations.
- JWT auth + RBAC, two-phase Excel bulk import (500+ students), enrollment state machine with audit trail
- Webcam photo capture, QR-enabled ID card generation (PDF batch), self-evaluation with trend comparison
- Polymorphic audit logging, service-layer architecture, standardized API error handling, and 14 feature test suites

E-commerce System

Full-Stack Developer | June 2026

- Built a full-stack e-commerce platform (ShopHub) using Laravel 12 with a RESTful JSON API and Vue 3 SPA frontend
- Implemented customer-facing features: product catalog with search/filter, shopping cart, checkout with stock deduction, order history, wishlist, product reviews, and user profiles
- Used Laravel Sanctum for token-based API authentication, MySQL for the database, and Tailwind CSS for responsive UI

Mentor Management System

Backend Developer & Project Coordinator | May – June 2026

- Built a REST API platform connecting mentees with mentors using a weighted matching algorithm.
- Designed and implemented 15+ modules including JWT authentication with token rotation and role based access control.
- Developed session lifecycle management and a feedback system for structured mentoring interactions.
- Deployed on Render and Vercel with CI/CD via GitHub Actions.
- Wrote comprehensive end to end test coverage using Jest.

Attendance Management System

Full-Stack Developer & Scrum Master | Feb-April 2026

- Architected a full-stack attendance platform for a Cambodian IT school (PNC) with Laravel 10 backend, Vue 3 + TypeScript frontend, MySQL, and Redis caching.
- Developed attendance tracking, RFID/fingerprint check-in, geofencing, role-based dashboards, reporting, and student risk monitoring features.
- Implemented Telegram Bot notifications, teacher timetable sync via external API, and Excel/CSV reporting all containerized with Docker and deployed via GitHub Actions CI/CD to AWS EC2.

EDUCATION BACKGROUND

Passerelles Numériques Cambodia (PNC) – Web Programming

2025 – Present

BacII Certificate – Rovieng High School

2023-2024
